EDUCATION

Adhiyamaan College of Engineering

BE - Computer Science and Engineering - **CGPA - 8.32**

2021 – 2025

Krishnagiri, Tamil Nadu

Swamy Vivekananda Matric Hr Sec School

12th - Percentage - **84.64**

2020 – 2021

Krishnagiri, Tamil Nadu

EXPERIENCE

Full Stack Developer Intern

Dec 2025 – Present

National Informatics Centre (NIC) – Krishnagiri Collector Office

Krishnagiri, Tamil Nadu

- Developed and documented an enterprise-grade secure login system using Spring Boot with both JPA-based and SQL stored procedure architectures, implementing advanced authentication and session management.
- Implemented client-side and server-side security including SHA-256 hashing, dynamic salting, iterative encryption, input validation, account locking, audit logging, IP tracking, and concurrent session prevention.

Software Development Intern

Mar 2025 – Sep 2025

Tap Academy

Bengaluru, Karnataka

- Gained hands-on experience in problem-solving and logical thinking by applying computer science fundamentals and backend frameworks including Spring Boot, Hibernate ORM, Maven, and API development.
- Strengthened expertise in Core Java, Advanced Java, relational databases (MySQL), Postman for API testing, and version control using Git/GitHub through real-world projects.

PROJECTS

GenAI-Powered FoodBot System 🗒 | Java, Spring Boot, LangChain4j, REST APIs, MCP, RAG

- Developed a full-stack GenAI-powered food chatbot system with menu browsing, order placement, tracking, customer profiling, and personalized recommendations using MVC architecture.
- Designed and implemented 6 AI agents using Generative AI (LangChain4j) with memory, tool calling, RAG-based retrieval, and autonomous multi-step workflows, integrated with MCP servers for delivery, payment, and inventory systems.

Secure Login System 🗒 | Spring Boot, Java, PostgreSQL, JPA, Hibernate, Thymeleaf, SHA-256

- Implemented a secure authentication system where the client encrypts passwords using SHA-256 with dynamic salt and iteration-based hashing before transmitting to the server.
- Designed a database-centric login verification flow in which the Spring Boot controller invokes a single SQL stored procedure to re-hash, validate credentials, and enforce account status checks.

AI-Integrated Food Delivery Web App 🗒 | Java Servlets, JSP, JDBC, JEE, MySQL, HTML, CSS, n8n

- Developed a full-stack AI-powered food delivery platform with user authentication, restaurant listings, dynamic menus, cart management, and secure order placement using MVC architecture and DAO design pattern.
- Implemented intelligent features like AI NutriTracer for meal image-based nutritional analysis and a Smart Assistant Chatbot using Google Gemini API and n8n workflow automation.

TECHNICAL SKILLS

Languages: Java (Core & Advanced, OOPs), Python, JavaScript, SQL, HTML, CSS

Technologies & Frameworks: Spring Boot, Hibernate, JSP, Servlets, JEE, JDBC, React.js, Node.js, Tailwind CSS, Maven, n8n(AI Agent), LangChain4j (Gen AI), Claude (LLM), Claude Code, Claude CoWork, OpenClaw, MCP (Model Context Protocol), Prompt Engineering, RAG (Retrieval-Augmented Generation)

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools & IDEs: GitHub, Git, VS Code, Eclipse IDE, MySQL Workbench, Figma, Postman

CERTIFICATIONS

- Introduction to Claude CoWork - Anthropic
- Claude Code in Action - Anthropic
- Full Stack Web Development - TAP Academy
- Java (Basic) - HackerRank
- SQL (Basic) - HackerRank
- React (Basic) - HackerRank
